Port services: market access and financing of maritime ports

2004/0240(COD) - 22/11/2005

The committee adopted the report by Georg JARZEMBOWSKI (EPP-ED , DE). Following a difficult vote on this controversial piece of legislation, the part of the report amending the Commission proposal did not secure a majority. However, the committee did adopt the draft legislative resolution ("Approves the Commission proposal as amended"), thereby leaving it up to the political groups (or groupings made up of at least 37 MEPs) to table amendments for plenary under the 1st reading of the codecision procedure.
