2004 discharge: European Aviation Safety Agency

2005/2118(DEC) - 21/03/2006

The committee adopted the report by Umberto GUIDONI (GUE/NGL, IT) recommending that Parliament should grant discharge for the implementation of the budget of the European Aviation Safety Agency for 2004.

In their accompanying comments, MEPs urged the Agency to respect the principle of specification in its initial and amending budgets, to improve budgetary management and to agree with the Commission on a transparent and coherent recruitment procedure consistent with the Agency's needs in terms of specifically qualified personnel. They also made a number of general remarks applicable to all the Community agencies:

- EU enlargement in 2004 had affected the structures and operating arrangements of the agencies in many ways, and the Commission should assess the real or supposed problems encountered and recommend the regulatory changes required;

- the agencies should spend the money available to them as efficiently and effectively as possible;

- the agencies should avoid duplication as far as possible and clarify measures for improving transparency and communication with the public, to overcome their often negative image which many of them did not deserve;

- the Commission should help harmonise the activity reports of the agencies - which differed significantly in terms of content - by informing them of the common indicators that they must provide;

- there was a need for improved cooperation between the agencies, particularly in such common areas as training, the use of the latest management systems and solving problems relating to sound management of the budget.
