

Medicinal products for paediatric use: implementing powers conferred on the Commission

2006/0207(COD) - 21/11/2006

The committee adopted the report by Françoise GROSSETÊTE (EPP-ED, FR) approving unamended - under the 1st reading of the codecision procedure - the proposed regulation amending the new regulation on medicinal products for paediatric use. The proposal was aimed at introducing into the regulation the new regulatory procedure with scrutiny that is now applicable for the exercise of implementing powers.
