Large combustion plants: emissions limit values (amend. Directive 88/609 /EEC)

1992/0524(SYN) - 14/09/1993 - Text adopted by Parliament, 1st reading/single reading

Parliament adopted the report by Mrs Ursula Schleicher (PPE, D) on the limitation of emissions of certain pollutants into the air from large combustion plants.

Large combustion plants: emissions limit values (amend. Directive 88/609 /EEC)

1992/0524(SYN) - 08/06/1994 - Council position

The only major amendment made by the Council to the Commission's proposal gives Member States the facility to grant installations authorized between 1 July 1987 and the deadline for transposition of the directive into national law an extra year for complying with the limit value set. Parliament's three amendments to the recitals were not accepted by the Council.

Large combustion plants: emissions limit values (amend. Directive 88/609 /EEC)

1992/0524(SYN) - 17/11/1994 - Text adopted by Parliament, 2nd reading

Parliament rejected the Council common position.

Large combustion plants: emissions limit values (amend. Directive 88/609 /EEC)

1992/0524(SYN) - 26/05/1993 - Economic and Social Committee: opinion, report

Large combustion plants: emissions limit values (amend. Directive 88/609 /EEC)

1992/0524(SYN) - 15/12/1994 - Final act

The Council directive amends Directive 88/609/EEC on the limitation of emissions of certain pollutants into the air from large combustion plants by adding emission limit values for sulphur dioxide from new solid fuel plants of between 50 and 100 megawatts to Annex III. This emission limit value of 2000mg SO2/m3 is based on the use of low sulphur fuel without any additional control measures. Member States have the facility to grant plants licensed before the deadline for transposition an additional year in which to comply with the new limit value.

Large combustion plants: emissions limit values (amend. Directive 88/609 /EEC)

1992/0524(SYN) - 18/12/1992 - Legislative proposal

The purpose of the proposal for a directive was to amend Directive 88/609/EEC on the limitation of emissions of certain pollutants into the air from large combustion plants by adding, in Annex III, limit values for sulphur dioxide (SO2) emissions from new plants fired by solid fuel with a rated thermal input of 50 to 100 megawatts. The adopted emission limit value of 2 000 mg SO2/m3 was based on the use of a fuel with low sulphur content without any additional measure of control. Annexed to the Commission's proposal was a report on the availability of low-sulphur solid fuels. The main conclusion that the Commission drew from this report was that sufficient quantities of low-sulphur coal were available at an acceptable cost.
