Final act

Regulation 1994/3116
OJ L 330 21.12.1994, p. 0001 Summary

Support system for producers of certain arable crops (amend. Regul. 1765/92/EEC)

1994/0217(CNS) - 12/12/1994 - Final act

The Council regulation made certain changes to the support system for producers of certain arable crops (durum wheat, oilseeds). The new regulation covered two types of measures applicable from the 1995/96 financial year: - granting aid of ECU 115/ha for a limited area of 50 000 ha of durum wheat, outside the traditional zones in France, and providing for an increase in the areas recognised as traditional areas for the production of durum wheat in Spain (+20 000 ha), Portugal (+5 000 ha) and Italy (+5 000 ha); - in Germany, providing for different penalties in the various LΣnder as a result of a simultaneous overrun in the maximum guaranteed area for oilseeds and the national reference area; - enabling the Member States to limit areas for which a producer could receive specific compensatory payments for sowing oilseeds.

Support system for producers of certain arable crops (amend. Regul. 1765 /92/EEC)

1994/0217(CNS) - 30/11/1994 - Text adopted by Parliament, 1st reading/single reading

Parliament approved the Commission proposal subject to three amendments. These amendments aimed to: - enable Member States to apply voluntary self restraint with regard to arable areas likely to be guaranteed by setting target sizes; - enable Member States which had regionalised their base area to aggregate between regions the sown areas for which aid had been claimed; - enable the Commission to authorise the Member States to take appropriate measures to avoid an excessive overrun of the maximum guaranteed area. (The Commission did not accept this amendment.)

Support system for producers of certain arable crops (amend. Regul. 1765 /92/EEC)

1994/0217(CNS) - 03/10/1994 - Legislative proposal

The proposal for a Council regulation concerned two types of measures applicable from the 1995/96 marketing year: - providing for aid of ECU 115/ha for a limited area of 50 000 ha of durum wheat, outside the traditional zones in France, and providing for an increase in the areas recognised as traditional areas for the production of durum wheat in Spain (+20 000 ha) and Italy (+ 5 000 ha); - in Germany, providing for different penalties in the various Lander as a result of a simultaneous overrun in the maximum guaranteed area for oilseeds and the national reference area.
