Directive 2000/0015
OJ L 105 03.05.2000, p. 0034 Summary

Health problems: intra-Community trade of bovine animals and swine (amend. Directive 64/432/EEC)

1998/0052(COD) - 16/09/1999

The European Parliament confirmed its first reading in the context of the codecision procedure of the text that it adopted on 16.06.1998 concerning this proposal for a directive.

1998/0052(COD) - 10/04/2000 - Final act

PURPOSE : to establish a system of identification and registration of bovine animals and regarding the labelling of beef and beef products and the creation of computer databases, for bovine and porcine animals and to store information on animals and their movements. COMMUNITY MEASURE : Directive 2000/15/EC of the European Parliament and the Council amending Council Directive 64/432/EEC on health problems affecting intra-Community trade in bovine animals and swine. CONTENT : in order to ensure the operation of the national computer databases concerning porcine animal, appropriate rules of application, including the information that the national databases must contain, shall be adopted. There shall be an entry in the database for each separate movement of porcine animals. The entry shall comprise at least the following: the number of porcine animals being moved, the identification number of the holding or herd of departure, the identification number of the holding of arrival and the departure and arrival dates. The European Parliament adopted the proposal (procedure without debate).

Health problems: intra-Community trade of bovine animals and swine (amend. Directive 64/432/EEC)

1998/0052(COD) - 24/01/2000 - Council position

The Council accepted the Commission's proposal but restricted the delegation of powers to databases for swine. It saw no justification for delegating powers for the databases for bovine animals, which should be in place by 31 December 1999 at the latest. The Council acknowledged the problem involved in setting up databases for swine by the prescribed deadline: the timetable for establishing computerised databases for swine has therefore been spread over three years.

Health problems: intra-Community trade of bovine animals and swine (amend. Directive 64/432/EEC)

1998/0052(COD) - 11/02/2000 - Commission communication on Council's position

The Council provides for the pig databases to be set up in three stages over three years. The Commission supports the Council's common position. The timetable takes account of technical requirements and does not call the principle of the Directive into question.

Health problems: intra-Community trade of bovine animals and swine (amend. Directive 64/432/EEC)

1998/0052(COD) - 18/02/1998 - Legislative proposal

OBJECTIVE: to amend Directive 64/332/EEC on health problems affecting intra-Community trade in bovine animals and swine. SUBSTANCE: Directive 64/432/EEC provides for the establishment of computer databases to store information on bovine animals and swine and their movements. In order to ensure the operation of these databases and the exchange of information between national databases within the Community, it is proposed that the Directive be amended to enable the Commission, if necessary, to adopt appropriate implementing provisions.
