Final act

Decision 1999/0022
OJ L 007 13.01.1999, p. 0020 Summary

Energy: multiannual programme of studies, analyses and forecasts 1998-2002 (ETAP)

1998/0233(CNS) - 20/10/1998 - Modified legislative proposal

The Commission's amended proposal incorporates the amendments adopted by the European Parliament, notably those relating to the following areas: - close monitoring and analysis of energy market trends both within the EU and at world level; - opening activities to participation by bodies representing consumers and European environmental organisations and associations.

Energy: multiannual programme of studies, analyses and forecasts 1998-2002 (ETAP)

1998/0233(CNS) - 08/10/1998 - Text adopted by Parliament, 1st reading/single reading

In adopting the report by Mr W.G. VAN VELZEN (PPE, NL) on the ETAP (studies, analyses and forecasts in the energy sector) programme, Parliament sought to strengthen the analyses and market monitoring concerning the liberalisation of the European energy sector, particularly - as regards electricity - in the context of the internal energy market, and also concerning security of energy supplies, as the Union is increasingly dependent on third countries for them.

Energy: multiannual programme of studies, analyses and forecasts 1998-2002 (ETAP)

1998/0233(CNS) - 14/12/1998 - Final act

OBJECTIVE: to provide within the multiannual framework programme for actions in the energy sector (1998-2002) a specific programme of studies, analyses, forecasts and other related work in the energy sector (ETAP programme). COMMUNITY MEASURE: Council Decision 1999/22/EC. CONTENTS: the specific programme adopted by the Council aims in particular to: - establish at Community level a shared approach to studies, analyses, forecasts and other related work in the energy sector; - to promote coordinated analyses of energy markets and policies at the level of the Community and the Member States; - to analyse and evaluate energy and environment questions, particularly in relation to climate change; - to analyse and evaluate energy market trends; - to help transfer the best analysis methods and practices; - to facilitate information networks in the energy field; - to develop an active policy for the dissemination of the results obtained. In order to achieve these objectives, the Community may undertake, promote or financially support measures such as: - observation, monitoring and exchanges of information or studies, analyses and forecasts; - the provision of technical and methodological assistance; - the development of links to promote energy-related political and economic research; - initiatives which contribute to the dissemination of results. The reference amount for the implementation of the ETAP programme is ECU 5 m (of which ECU 2 m for the period 1998/1999).

Energy: multiannual programme of studies, analyses and forecasts 1998-2002 (ETAP)

1998/0233(CNS) - 15/07/1998 - Legislative proposal

OBJECTIVE: to provide within the multiannual framework programme for actions in the energy sector (1998-2002) a specific programme of studies, analyses, forecasts and other related work in the energy sector (ETAP programme). SUBSTANCE: the specific programme proposed by the Commission aims in particular to: - establish at Community level a shared approach to studies, analyses, forecasts and other related work in the energy sector; to promote analyses of energy markets and policies at the level of the Community and Member States; - to analyse and evaluate energy and environment questions, particularly in relation to climate change; - to analyse and evaluate energy market trends; - to help identify and transfer the best analysis methods and practices; - to facilitate information networks in the energy field; - to develop an active policy for the dissemination of the results obtained.
