[Summary](#)

Denominations and technical specifications of euro coins intended for circulation

1998/0270(SYN) - 18/11/1998 - Text adopted by Parliament, 1st reading/single reading

In adopting the report by Mrs Irene SOLTWEDEL-SCHÄFER (Greens, D) Parliament approved the Commission proposal amending the technical specifications of euro coins. The three amendments proposed (increase in the weight of the 50 cent coin, modifying the definition of the edge of the 50 and 10 cent coins) deal with the objections raised by the European Vending Association and the European Blind Union. Parliament, in retabling an amendment which it had already tabled at the second reading of the initial proposal on euro coins, called for the striking of a new symbolic coin in gold with a nominal value of 100 euro, in addition to the eight normal coins.

Denominations and technical specifications of euro coins intended for circulation

1998/0270(SYN) - 29/07/1998 - Legislative proposal

OBJECTIVE: to amend Regulation 975/98/EC to the extent necessary to give satisfaction to the abovementioned specific requirements recently expressed by the vending industry and the European Blind Union. SUBSTANCE: The proposal for a regulation is exclusively aimed at amending the weight of the 50 cent coin and the definition of the edge of the 50 cent and 10 cent coins. The other features of Regulation 975/98/EC remain unchanged and are outside the scope of this proposal.

Denominations and technical specifications of euro coins intended for circulation

1998/0270(SYN) - 22/02/1999 - Final act

PURPOSE: to amend regulation 975/98/EC in response to the requests of the vending industry and the European Blind Union. COMMUNITY MEASURE: Council Regulation 423/1999/EC amending regulation 975/98/EC on denominations and technical specifications of euro coins intended for circulation. CONTENT: the regulation increases the weight of the 50 cent coin from 7 to 7.8 grammes and redefines the edge of the 50 and 10 cent coins from being "coarse milled" to being "shaped with fine scallops". ENTRY INTO FORCE: 01/01/1999.

Denominations and technical specifications of euro coins intended for circulation

1998/0270(SYN) - 09/02/1999 - Text adopted by Parliament, 2nd reading

At its second reading under cooperation procedure without debate, the European Parliament approved the decision on the common position adopted by the Council with a view to adopting the Council Regulation (EC) amending Council Regulation 975/98/EC on denominations and technical specifications of euro coins intended for circulation. The rapporteur was Irene Barbara Lilia Soltwedel-Schäfer (V,DE).

Denominations and technical specifications of euro coins intended for circulation

1998/0270(SYN) - 14/12/2000

On 5 June 2000, the Council adopted conclusions on the release of euro coins samples to relevant industries. Further to those conclusions, the Economic and Financial Committee considered it appropriate to complete them on several points. Furthermore, the Committee suggested that at the same occasion the Council adopt conclusions concerning modalities for the timely unveiling to the general public of the final visual appearance features of euro bank notes and coins. Accordingly the Council adopted the following conclusions: 1) Loans of euro coins and euro tokens to relevant industries: additional measures are necessary for the timely adjustment of coin operated machines to the euro coins. Furthermore, the conditions for the release of the confidential information and for the loans of euro coins and euro tokens will be the same as those which are currently applicable to manufacturers of validators. In early 2001 these conditions will be reviewed both for manufacturers and operators, with a view to adapting them as from spring 2001. With the start of the frontloading period later in 2001, consideration will be given to align these conditions with those applicable to frontloading. 2) Unveiling the visual appearance features of the euro bank notes and coins to the public: it is important that the public be familiarised with the detailed characteristics of the euro bank notes and coins. The final visual appearance of the euro bank notes and coins should be unveiled to the general public in time before their circulation on 1 January 2002. The appropriate time to start unveiling these characteristics is September 2001. This should best be done in the framework of the information campaigns, common for the euro bank notes and coins, conducted by the European Central Bank and the national central banks of the Eurosystem, by the European Commission and by the government authorities in each of the euro area Member States. In addition, with regard to the single facility providing medium-term financial assistance for Member States' balances of payments, the Council's conclusions are as follows: - with the start of the third stage of economic and monetary union, this facility only applies to member States which have not adopted the euro, in accordance with the Treaty provisions; - considers that this facility continues to meet, in its principle and arrangements, the need which led to its creation, in particular in the light of future accessions; agrees that loans granted under this facility should be financed exclusively by the capital market; - agrees that the ceiling of the facility should be reduced from EUR 16 billion to EUR 12 billion; - invites the Commission to present in due course a proposal amending Regulation 1969/88/EEC in this respect.

Denominations and technical specifications of euro coins intended for circulation

1998/0270(SYN) - 11/01/1999 - Commission communication on Council's position

The Commission fully approves of the Council Common Position as it entirely reflects the Commission's initial proposal. The Council did not include the single amendment approved by the European Parliament at first reading. This amendment had also been rejected by the Commission.

Denominations and technical specifications of euro coins intended for circulation

1998/0270(SYN) - 21/12/1998 - Council position

The Council Common Position is identical to the Commission proposal. The only amendment voted by the European Parliament at first reading suggests the introduction of a gold coin intended for circulation with a face value of 100 euro. The Council did not include this amendment in its Common Position on grounds relating to the very likely discrepancy between market value and nominal value, to the risk of speculative hoarding and the already planned issue of a 100 euro banknote.
