Decision 1999/0408
OJ L 156 23.06.1999, p. 0023 Summary

EC/Canada Agreement: amending the scientific and technical cooperation agreement

1998/0316(CNS) - 13/04/1999 - Text adopted by Parliament, 1st reading/single reading

Under consultation procedure without debate, the European Parliament adopted the legislative resolution by Jup Weber (V,LU), which approves the Commission proposal for a Council decision concluding the Agreement amending the Agreement for Scientific Cooperation between the European Community and Canada.

EC/Canada Agreement: amending the scientific and technical cooperation agreement

1998/0316(CNS) - 19/11/1998 - Legislative proposal

OBJECTIVE: to widen the field of application of the Agreement for Scientific and Technological Cooperation between the European Community and Canada. CONTENT: the Agreement for Scientific and Technological Cooperation between the European Community and Canada entered into force on 27 February 1996. This agreement was designed to stimulate cooperation in the area of RTD between the parties in terms of research projects conducted under the Community framework for RTD, and to develop joint research projects on the basis of mutual interest (see CNS95227). In the meantime, the parties have expressed the desire to amend the Agreement in order to widen its field of application. This is the objective of this proposal to amend the Agreement, which aims to extend current cooperation to all areas covered by Article 130 G(a) of the Treaty (?implementation of research, technological development and demonstration programmes, by promoting cooperation with and between undertakings, research centres and universities?) and, only as far as networks between infrastructure operators and related research projects are concerned, Article 130 G(d) of the Treaty (?stimulation of the training and mobility of researchers in the Community"). The proposal stipulates that for Canada, these activities include all non-defence science and technology activity funded or performed by services or agencies of the Canadian government (this cooperation may include science activities funded by the governments of the provinces or territories of Canada).

EC/Canada Agreement: amending the scientific and technical cooperation agreement

1998/0316(CNS) - 29/04/1999 - Final act

PURPOSE : to broaden the field of application of the Agreement for Scientific and Technological Cooperation between the European Community and Canada. COMMUNITY MEASURE : Council Decision 1999/408/EC concerning the conclusion of the Agreement amending the Agreement for Scientific and Technological Cooperation between the European Community and Canada. CONTENT : on the 27.02.1996 the Agreement for Scientific and Technological Cooperation between the European Community and Canada entered into force. This Agreement aimed to stimulate cooperation in the area of research and development techniques between the parties in terms of research projects backed up by the Community Framework Programme for Research and Technological Development and to develop joint research projects on the basis of mutual interest (see procedure 1995 /0227 CNS). In the meantime, the parties expressed the wish to amend the Agreement in order to broaden the field of application. The objective of this Decision is to amend the Agreement which seeks to extend the current cooperation to all the fields which are covered by Article 130 G, point a) of the Treaty (implementation of research programmes, technological development and demonstration by promoting the cooperation between businesses, research centres and universities) only as far as the infrastructure network users and the research programmes relating to them are concerned. The Decision stipulates that for Canada, these activities will cover all the scientific and technological activities other than defence financed or carried out by the services or agencies of the government of Canada (this cooperation may eventually include scientific activities financed by the Provincial Governments or the territories of this country). ENTRY INTO FORCE : the amending Agreement will enter into force on 30.04.1999.
