Regulation 2001/0300
OJ L 044 15.02.2001, p. 0012 Summary

Conservation of fishery resources: recovery of the stock of cod in the Irish Sea, measures for 2001

2000/0292(CNS) - 14/02/2001 - Final act

PURPOSE : to provide additional protection measures for the stock of cod in the Irish Sea for the season 2001. COMMUNITY MEASURE : Council Regulation 300/2001/EC establishing measures to be applied in 2001 for the recovery of the stock of cod in the Irish Sea (ICES division VIIa). CONTENT : in November 1999, the International Council for the Exploration of the Sea (ICES) indicated that the stock of cod in the Irish Sea is at a serious risk of collapse. The advice from the ICES also indicated that the quantity of mature cod in the Irish Sea would remain at a very low level during 2000 and 2001. Therefore, Commission Regulation 304/2000/EC of 9 February established measures for the recovery of the stock in the Irish Sea, whereby measures were put in place to protect adult cod during the spawing season of 2000. During the period of application of these measures, further scientific work has been completed and practical experience gained which imply that the conditions applied in 2000 should be modified to a certain extent for 2001. In particular, two types of fishing which have been prohibited with in the area of the Irish Sea should now be permitted. Furthermore, these types of fishing should be subject to observation and to conditions whereby such activities will cease if the by-catch of cod becomes excessive. The present Regulation lays down measures to protect mature cod during their spawning season of 2001 in the Irish Sea. ENTRY INTO FORCE : 15/02/2001.

Conservation of fishery resources: recovery of the stock of cod in the Irish Sea, measures for 2001

2000/0292(CNS) - 13/02/2001 - Text adopted by Parliament, 1st reading/single reading

The European Parliament has endorsed the report by Mr James NICHOLSON (EPP/ED, UK) with one amendment which relates to a derogation for haddock fishing. Parliament would like the derogation extended until 30 April rather than 22 March as proposed by the Commission.

Conservation of fishery resources: recovery of the stock of cod in the Irish Sea, measures for 2001

2000/0292(CNS) - 22/11/2000 - Legislative proposal

PURPOSE : to establish measures to be applicable in 2001 for the recovery of the stock of cod in the Irish Sea. CONTENT : scientific advice provided in November 1999 by the International Council for the Exploration of the Sea indicated that the quantity of mature cod currently present in the Irish Sea is at an historically low level and that this quantity is likely to decrease further in 2001. This gives rise to concern that this stock may be in a condition such that it cannot readily replenish itself by reproduction. Steps have already been taken to protect mature cod during the spawning season of 2000 to allow them to produce as many eggs as possible in the hope that this will result in abundant young cod this year. Similar conditions need to be established during the spawning season of 2001.
