Excise duty: structure and rates applied on manufactured tobacco

2001/0063(CNS) - 12/02/2002 - Final act

AIM: To amend Community legislation on the taxation of manufactured tobacco. COMMUNITY MEASURE: Council Directive 2002/10/EC. CONTENT: The Council has adopted amendments to Directives 92/79/EEC, 92/80/EEC and 95/59/EEC regarding the excise duty applied to manufactured tobacco and has minuted a declaration by Sweden and a declaration by the Commission. The aims of the new provisions are to reduce the considerable divergences that still exist between Member States with regard to the taxation of tobacco products and to help, through closer convergence of the rates applied in the Member States, to reduce fraud and smuggling within the Community. ENTRY INTO FORCE: 8 March 2002 IMPLEMENTATION: 1 July 2002. Germany, Spain and Greece may postpone the implementation of certain provisions until 1 January 2008 at the latest.

Excise duty: structure and rates applied on manufactured tobacco

2001/0063(CNS) - 05/02/2002 - Text adopted by Parliament, 1st reading/single reading

The European Parliament adopted by 325 to 151 with 50 abstentions, the report by Mr Giorgos KATIFORIS (PES, GR). In a second condideration of a Commission proposal to set a minimum excise duty of 57% of the retail sale price and EUR 70 for 1000 cigarettes, MEPs voted to recommend a rate of 57% of the retail sale price and a reduced rate of EUR 60 for 1000, or an alternative option of allowing the Member States to charge 71% of the retail sale price. Parliament's non-binding amendment seeks to introduce an element of flexibility and allow the Member States to choose the most appropriate method suited to their needs. Another non-binding amendment approved seeks to reduce the impact of the on East European candidate

countries by providing for a EUR 85 excise duty per 1000 cigarettes under which countries would not have to impose the maximum 57% of retail price figure rather than the EUR 100 proposed by the Commission. Other non-binding amendments approved concern the definition of cigars and cigarillos and emphasise the need for the Commission to come up with proposals to tackle cigarette smuggling. Proposed amendments taking up health issues were rejected. Furthermore, Commissioner Fritz BOLKESTEIN stated that he could not however accept the amendments, arguing that the Parliament's approach would lead to less rather than more harmonisation of tobacco taxes and that this would even make it possible for a number of Member States, including Member States applying relatively low tax levels to lower their rates. The Commission, he added, was now proposing a limited number transitional period to allow candidate countries to reach the minimum rate of taxation.

Excise duty: structure and rates applied on manufactured tobacco

2001/0063(CNS) - 14/03/2001 - Legislative proposal

PURPOSE: to amend Directive 92/79/EEC, Directive 92/80/EEC and Directive 95/59/EC as regards the structure and rates of excise duty applied on manufactured tobacco. CONTENT: this proposal for a Directive suggests a number of important amendments to existing Community legislation on the taxation of manufactured tobacco, while keeping the main pillars of the acquis unchanged rather than establishing a new system. The proposed amendments are the result of an in-depth examination by the Commission of the rates and structure of excise duty on tobacco products carried out in response to a request from a large number of Member States in a statement entered in the minutes when Council Directive 1999/81/EC was adopted. An analysis of the changes of prices and excise rates for toabacco products in the Community shows that there are still considerable differences between Member States which may disturb the operation of the internal market. Therefore greater convergence between the tax rates applied in the Member States would help reduce fraud and smuggling within the Community. Therefore, Directive 92/79/EEC has been amended to provide that each Member States shall apply an overall minimum excise duty, the incidence of which shall be set at 57% of the retail selling price and EUR 70 per 1000 cigarettes of the price category most in demand. Member States which levy a total excise duty of at least EUR 100 per 1000 cigarettes for cigarettes of the price category most in demand need not comply with the 57% minimum incidence requirement. Furthermore, Directive 92/80/EEC is amended in order to avoid a fall in the value of the Community minimum rates on duty on cigars, cigarollos, fine-cut tobacco intended for the rolling of cigars and other smoking tobaccos, a phased increase in the minimum rates, expressed as a specific amount, is needed. Finally, in the interests of uniform and fair taxation, the defintion of cigars and cigarollos, set out in Council Directive 95/59/EC on taxes other than turnover taxes which affect the consumption of manufactured tobacco, shall be adapted to so that a type of cigar which is similar in many respects to a cigarette is treated as a cigarette for excise purposes.

Excise duty: structure and rates applied on manufactured tobacco

2001/0063(CNS) - 15/11/2001 - Text adopted by Parliament, partial vote at 1st reading/single reading

The European Parliament has sent the report by Mr Giorgos KATIFORIS (PES, GR) back to committee after the proposal was rejected by 136 for, 330 against and 24 abstentions.
