## European Maritime Safety Agency: competence

2003/0159(COD) - 31/03/2004 - Final act

PURPOSE: to widen the European Maritime Safety Agency's competence in order to improve maritime safety and security.

LEGISLATIVE ACT: Regulation 724/2004/EC of the European Parliament and of the Council amending Regulation 1406/2002/EC establishing a European Maritime Safety Agency.

CONTENT: Regulation 1406/2002/EC established a European Maritime Safety Agency ("the Agency") for the purpose of ensuring a high, uniform and effective level of maritime safety and prevention of pollution by ships. Recent accidents in Community waters, particularly those of the oil tankers "Erika" and "Prestige", demonstrated the need for additional Community action not only in the field of pollution prevention, but also in the pollution response field. The Agency needed to be provided with the appropriate means to support on request the pollution response mechanisms of the Member States. The activities of the Agency in this field will not relieve coastal States of their responsibility to have appropriate pollution response mechanisms in place and will respect existing cooperation arrangements between Member States or groups of Member States in this field. In the event of a pollution incident, the Agency will assist the affected Member State under the authority of which the cleaning up operations will be conducted. The Agency will act in support of the Community mechanism in the field of civil protection. Furthermore: - Directive 2003/103/EC on the minimum level of training of seafarers introduces new procedures with regard to the recognition of certificates of competency of seafarers issued by third countries. The Agency will assist the Commission in the evaluation of the compliance of those countries with the requirements of the 1978 International Convention on Standards of Training, Certification and Watchkeeping (STCW Convention). - The Administrative Board of the Agency will have the competence, in agreement with the Commission, to define a policy plan with regard to the Agency's pollution preparedness and response activities. In drawing up the plan, the Administrative Board will take into account the added value which the Agency's pollution response activities involve for the activities of the Member States, as well as the best possible combination of cost and efficiency. - Regard will be had to the existing agreements on accidental pollution, such as the Agreement for cooperation in dealing with pollution of the North Sea by oil and other harmful substances, 1983 (Bonn Cooperation Agreement), which facilitate mutual assistance and cooperation between Member States in this field, as well as to the relevant international conventions and agreements for the protection of European maritime areas from pollution incidents, such as the International Convention on Oil Pollution Preparedness, Response and Cooperation, 1990 (OPRC Convention) developed under the auspices of the IMO, the Convention for the Protection of the Marine Environment of the North-East Atlantic of 22 September 1992 (OSPAR Convention), the Barcelona Convention, the Helsinki Convention and the Lisbon Agreement. - For future appointments in the administrative structure of the Agency (Administrative Board, Executive Director), due account must be taken of the required experience and expertise in the new fields of competence of the Agency: the response to pollution caused by ships, and maritime security. - Third countries wishing to participate in the Agency must apply Community law in all fields of competence of the Agency, including the response to pollution caused by ships and maritime security.

ENTRY INTO FORCE : 19/05/04.

## European Maritime Safety Agency: competence

2003/0159(COD) - 12/02/2004 - Text adopted by Parliament, 1st reading/single reading

The European Parliament adopted a resolution drafted by Emmanouil MASTORAKIS (PES, GR) making some amendments to the Commission's proposals. (Please see the summary of 21/01/04.) In addition, Parliament added the following key amendments: - the Agency can only assist with maritime security within the limits of the tasks defined in the Regulation; - regard should be had to the existing agreements on accidental pollution, such as the Bonn Co-operation Agreement, which facilitate mutual assistance and cooperation between Member States in this field, as well as to the relevant international conventions and agreements for the protection of European maritime areas from pollution incidents, such as the OPRC Convention 2 developed under the auspices of the IMO, the OSPAR Convention 3, the Barcelona Convention, the Helsinki Convention and the Lisbon Agreement. - an additional task for the Agency is the verification of compliance of third countries with the requirements of the STCW Convention and of the measures taken to prevent fraud involving certificates of competency; - a new clause is added on the adoption of the work programme. In the event that the Commission expresses, within 15 days from the date of adoption of the work programme, its disagreement with the programme, the Administrative Board must reexamine the programme and adopt it, possibly amended, within a period of two months, in second reading either with a

two-thirds majority, including the Commission representatives, or by unanimity of the representatives of the Member States; - a new clause was added on the Executive Directors responsibilities on the work programme and the detailed plan for the Agency's pollution preparedness and response activities.

## European Maritime Safety Agency: competence

2003/0159(COD) - 06/08/2003 - Legislative proposal

**PURPOSE** : to widen the European Maritime Safety Agency's competence in order to improve maritime safety and security. **CONTENT** : in the aftermath of the Erika and Prestige disasters, maritime safety legislation has been drastically improved to guarantee the highest level of environment protection to European shores and waters. The Commission is determined to ensure that these rules are adequately and strictly applied. The newly established European Maritime Safety Agency provided the appropriate framework for developing concrete pollution response actions at Community level. In order to give to the Agency the competence and the means to act, the Commission proposes to amend accordingly Regulation 1406/2002 which established the Agency. To this end, Regulation 1406/2002 has to be amended to: - provide the Agency with the legal competence and the appropriate means to fight accidental and illicit pollution caused by ships. The actions undertaken by the Agency will supplement the efforts of Member States and provide added value to the Community framework for co-operation in the field of marine pollution and civil protection and the Community mechanism in the field of civil protection; - enlarge the objectives of the Agency in order to cover the field of maritime security, allowing the Agency to supplement the Community policy in this field in line with the Commission Communication on enhancing maritime transport security; - further define the Agency's competence in the field of the training of seafarers in order to reflect the enlarged role attributed to the Commission and to the Agency in line with the revision of Directive 2001/25/EC on the minimum level of training of seafarers. **FINANCIAL STATEMENT** : - Budget lines : 06020201 and 06020202: European Maritime Safety Agency (Subsidy for titles 1, 2 and 3), 06020203: European Maritime Safety Agency (Subsidy for anti-pollution measures ); - Period of application : indefinite, starting in 2004; - Anti-pollution measures (budget line 06020203): European Maritime Safety Agency: an budget of EUR 20 million have been programmed by the Commission for each year of the period 2004-2006, subject to revision in line with future decisions by the legislative authority. An amount of EUR 20 million has been allocated in the 2004 Draft Community budget for this action; - Support activities for the 3 activities provided for in the Regulation (studies, meetings and publications) (budget line 06020202) EUR 650 000 for the period 2004-2006; - Impact on staff and administrative expenditure : 25 posts in total (3 permanent and 22 temporary); - Overall financial impact of human resources (2004-2006) (budget lines 06020201 and 06020202) :EUR 3 240 000 for 12 months.
