Regulation 2019/2160 OJ L 328 18.12.2019, p. 0001		Summary

Exposures in the form of covered bonds

2018/0042(COD) - 26/11/2018 - Committee report tabled for plenary, 1st reading/single reading

The Committee on Economic and Monetary Affairs adopted the report by Bernd LUCKE (ECR, DE) on the proposal for a regulation of the European Parliament and of the Council on amending Regulation (EU) No 575/2013 as regards exposures in the form of covered bonds.

The proposed Regulation aims to amend Regulation (EU) No 575/2013 (the Capital Requirements Regulation or CRR) by providing for **additional requirements for covered bonds**, which will enhance the quality of covered bonds eligible for preferential capital treatment as defined in Article 129 of the Regulation.

The amendments build on the current prudential treatment but add **requirements on minimum overcollateralisation and substitution assets**. They would strengthen the requirements for granting preferential prudential treatment to guaranteed bonds. The amended text specifies that Member States can decide to apply a higher minimum level of overcollateralisation to covered bonds issued by credit institutions located in their territory, without preventing other covered bonds with a lower minimum level of overcollateralisation that comply with this Regulation from benefitting from its provisions

Such a requirement serves the purpose of **mitigating the most relevant risks** arising in case of the issuer's insolvency or resolution.

The European Parliament, in its [resolution of 4 July 2017](#) entitled 'Towards a pan-European covered bonds framework', supported the creation of a European framework for principles-based covered bonds.

Exposures in the form of covered bonds

2018/0042(COD) - 12/03/2018 - Legislative proposal

PURPOSE: to amend the requirements for the prudential treatment of covered bonds in order to promote the development of covered bond markets.

PROPOSED ACT: Regulation of the European Parliament and of the Council.

ROLE OF THE EUROPEAN PARLIAMENT: the European Parliament decides in accordance with the ordinary legislative procedure and on an equal footing with the Council.

BACKGROUND: this proposal for a Regulation amending Regulation (EU) No 575/2013 (Capital Requirements Regulation – CRR) is part of a package of measures to deepen the [Capital Markets Union](#) (CMU), together with the Communication "[Completing Capital Markets Union by 2019 – time to accelerate delivery](#)".

Covered bonds are financial instruments that are generally issued by banks to fund the economy. They facilitate the financing of mortgage and public sector loans, thereby supporting lending more broadly. Covered bonds fared well during the financial crisis and proved to be a **reliable and stable funding** source at a time as other funding channels dried up.

However, **diverse rules** across Member States affect the credit strength of those instruments. In addition, covered bonds markets are unevenly developed across the Single Market. While they are very important in some Member States, they are less developed in others.

While they benefit from preferential prudential and regulatory treatment in various respects in the light of the lower risks (e.g. banks investing in them do not have to set aside as much regulatory capital as when they invest in other assets), Union law does not comprehensively address what actually constitutes a covered bond.

The Commission considers that a **Union legislative framework** on covered bonds should:

- expand the capacity of credit institutions to provide financing to the real economy and contribute to the development of covered bonds across the Union, particularly in Member States where no market for them currently exists;
- increase cross-border flows of capital and investment which would provide investors with a wider and safer range of investment opportunities, contribute to financial stability and help finance the real economy.

The framework consists of a [Directive](#) on definitions and standards for covered bonds and a Regulation amending the Capital Requirements Regulation (CRR) – the two instruments should be seen as a single package.

IMPACT ASSESSMENT: of the four options considered, the option chosen is that of **minimum harmonisation based on national regimes**. It is based on the recommendations made in the 2016 European Banking Authority (EBA) report, with the exception of a few deviations.

It is likely to be the most effective in achieving the objectives, while at the same time being efficient and minimising disruption and transition costs. It is also one of the more ambitious options in regulatory terms, while enjoying the most support from stakeholders.

CONTENT: this proposed Regulation will mainly amend Article 129 of Regulation (EU) No 575/2013 (Capital Requirements Regulation (CRR)) with the aim of strengthening the conditions for granting preferential capital treatment by **adding further requirements**.

The amendments build on the current prudential treatment but **add requirements on minimum overcollateralisation and substitution assets**.

Article 129 of Regulation (EU) No 575/2013 allows covered bonds to be collateralised by senior units issued by French *Fonds Communs de Titrisation* or equivalent entities governed by the laws of a Member State that securitise residential or commercial property exposures under certain conditions, including the provision that such units do not exceed 10 % of the nominal amount of the outstanding issue. **This possibility is repealed**, as only a few national covered bond frameworks allow the inclusion of residential or commercial mortgage-backed securities.

The proposed amendments introduce a **new requirement on a minimum level of overcollateralisation** (a level of collateral exceeding the coverage requirements). This level is set at 2 and 5%, depending on the assets in the cover pool, based on a nominal calculation method.

Exposures in the form of covered bonds

2018/0042(COD) - 22/08/2018

OPINION of the European Central Bank on a proposal for a directive of the European Parliament and of the Council on the issue of covered bonds and covered bond public supervision and amending Directive 2009/65/EC and Directive 2014/59/EU; and on a proposal for a regulation of the European Parliament and of the Council on amending Regulation (EU) No 575/2013 as regards exposures in the form of covered bonds.

The ECB welcomes the objectives of the [proposed directive](#) and regulation of promoting further integration of Union financial markets and deepening the Capital Markets Union (CMU). It is in favour of a developed, harmonised, high-quality and transparent covered bond market in the Union.

Specific observations on the proposed regulation

The ECB welcomes a harmonised approach towards minimum overcollateralisation. A uniform calculation method without exceptions is favoured.

The ECB therefore has reservations about the proposal to apply different requirements in certain situations.

The ECB also welcomes the fact that the proposed regulation clarifies that the loan-to-value (LTV) limits should be applied as soft coverage limits. This LTV limit should be applied not only upon inclusion of such loan but throughout the entire maturity of the loan.

For the purpose of the LTV limits, it would be prudent for the property value to be monitored and updated at least on a yearly basis by using an indexation method, in addition to the other requirements for immovable property collateral that are set out in Article 208 of Regulation (EU) No 575/2013.

The ECB recommends, furthermore:

- that the assets that may contribute to mandatory overcollateralisation should be eligible assets as listed in the proposed regulation, and be subject to the same limits on exposure size as set out in the proposed regulation
- setting out qualitative requirements for substitution assets for covered bonds, applying the same requirements as for eligible assets in accordance with the proposed regulation;
- including in the proposed regulation a requirement that substitution assets must not exceed 20 % of the total nominal amount of all outstanding covered bonds of the issuer.

Exposures in the form of covered bonds

2018/0042(COD) - 18/12/2019 - Final act

PURPOSE: to strengthen the conditions for granting preferential prudential treatment to covered bonds.

LEGISLATIVE ACT: Regulation (EU) 2019/2160 of the European Parliament and of the Council amending Regulation (EU) No 575/2013 as regards exposures in the form of covered bonds.

CONTENT: the Regulation amends [Regulation \(EU\) No 575/2013](#) (the Capital Requirements Regulation or CRR) by providing for additional requirements for covered bonds, which shall enhance the quality of covered bonds eligible for the favourable supervisory treatment set out in Article 129 of that Regulation.

The Regulation is part of the adopted new legal framework (also consisting of a [Directive](#)) setting minimum harmonisation requirements that all covered bonds marketed in the EU shall have to comply with. The harmonised regulatory framework shall provide a stable source of funding for credit

institutions, which shall be better able to provide mortgage credit at a price affordable to consumers and businesses and will make other, safer investments available to investors.

In its opinion of 1 July 2014, the European Banking Authority (EBA) considered that the preferential treatment in the risk weighting provided for in the CRR Regulation was, in principle, an appropriate supervisory treatment. However, the EBA recommended that further consideration should be given to the possibility of complementing the eligibility conditions for the risk weighting preference to cover, at least, liquidity risk mitigation and over-collateralisation, the role of competent authorities and the development of existing investor information requirements.

In the light of the EBA's opinion, the Regulation strengthens the conditions for granting preferential supervisory treatment to covered bonds under the Capital Requirements Regulation.

The amendments introduced build on the current supervisory treatment, but add requirements for minimum over-collateralisation and substitution assets, thereby strengthening the quality of covered bonds eligible for favourable capital treatment.

The European Parliament, in its [resolution](#) of 4 July 2017 entitled 'Towards a pan-European framework for covered bonds', supported the creation of a principle-based European framework for covered bonds.

ENTRY INTO FORCE: 7.1.2020.

APPLICATION: from 8.7.2022.

Exposures in the form of covered bonds

2018/0042(COD) - 18/04/2019 - Text adopted by Parliament, 1st reading/single reading

The European Parliament adopted by 426 votes to 103, with 39 abstentions, a legislative resolution on the proposal for a regulation of the European Parliament and of the Council on amending Regulation (EU) No 575/2013 as regards exposures in the form of covered bonds.

The European Parliament's position adopted at first reading under the ordinary legislative procedure amended the Commission proposal as follows:

The proposed Regulation aims to amend Regulation (EU) No 575/2013 (the Capital Requirements Regulation or CRR) by providing for additional requirements for covered bonds, which will enhance the quality of covered bonds eligible for preferential capital treatment as defined in Article 129 of the Regulation.

On 20 December 2013, the Commission requested to the European Banking Authority (EBA) to provide an opinion regarding the appropriateness of the risk weights set out in Article 129 of Regulation (EU) No 575/2013. According to EBA's opinion, the preferential risk weight treatment laid down in Article 129 of that Regulation is, in principle, an appropriate prudential treatment.

However, EBA recommended that further consideration be given to the opportunity of complementing the eligibility requirements as set out by Article 129 of Regulation (EU) No 575/2013 to cover, at a minimum, the areas of liquidity risk mitigation, over-collateralisation, the role of the competent authority, and the further elaboration of existing requirements on disclosure to investors.

The amendments build on the current prudential treatment but add requirements on minimum overcollateralisation and substitution assets. They would strengthen the requirements for granting preferential prudential treatment to guaranteed bonds.

The amended text specifies that Member States can decide to apply a higher minimum level of overcollateralisation to covered bonds issued by credit institutions located in their territory, without preventing other covered bonds with a lower minimum level of overcollateralisation that comply with this Regulation from benefitting from its provisions. Such a requirement serves the purpose of mitigating the most relevant risks arising in case of the issuer's insolvency or resolution.
