Final act	
Decision 2019/0984 OJ L 164 20.06.2019, p. 0030	Summary

Road vehicles: time limit for the implementation of the special rules regarding maximum length in case of cabs delivering improved aerodynamic performance, energy efficiency and safety performance

2018/0130(COD) - 20/06/2019 - Final act

PURPOSE: to confirm the arrival date of safer and more aerodynamic truck cabs.

LEGISLATIVE ACT: Decision (EU) 2019/984 of the European Parliament and of the Council amending Council Directive 96/53/EC as regards the time limit for the implementation of the special rules regarding maximum length for cabs delivering improved aerodynamic performance, energy efficiency and safety performance.

CONTENT: this Decision amends Council Directive 96/53/EC on the maximum length of heavy goods vehicles by bringing forward the date of authorisation of an extension of the cab to provide it with a more rounded front, without reducing the vehicle load capacity.

Before aerodynamic cabs may be placed on the market, they must meet the necessary approval conditions. The Commission shall take the necessary measures to provide for the type-approval of the vehicles or vehicle combinations concerned by 1 November 2019 at the latest. Trucks with more rounded cabs at the front should appear on European roads from 1 September 2020.

The curved cabs shall significantly reduce fuel consumption and improve safety.

ENTRY INTO FORCE: 10.7.2019.

Road vehicles: time limit for the implementation of the special rules regarding maximum length in case of cabs delivering improved aerodynamic performance, energy efficiency and safety performance

2018/0130(COD) - 26/03/2019 - Text adopted by Parliament, 1st reading/single reading

The European Parliament adopted by 635 votes to 22 with 5 abstentions a legislative resolution on the proposal for a decision of the European Parliament and of the Council amending Council Directive 96/53/EC as regards the time limit for the implementation of special rules on the maximum length for cabs improving aerodynamic performance, energy efficiency and safety performance.

The proposal aims to amend Council Directive 96/53/EC as regards the deadline for the implementation of the special rules regarding maximum length in case of cabs delivering improved aerodynamic performance, energy efficiency and safety performance.

The position of the European Parliament adopted at first reading under the ordinary legislative procedure has amended the Commission proposal as follows:

The Commission should take the necessary measures, within the framework established by Directive 2007/46/EC, to provide for the type-approval of vehicles or vehicle combinations referred to in Directive 96/53/EC by 1 November 2019 at the latest. The provisions would apply from 1 September 2020.

A recital highlights the transport sector and equipment manufacturers need sufficient time to develop new services and products. In order to take advantage of more flexible design rules for cabs, the Commission should take measures to ensure that the necessary technical provisions can be adopted as soon as possible, with a view to ensuring a smooth and rapid placing on the market of a new generation of cabs.

In addition, the Commission and the Member States, acting in their respective roles within the Technical Committee on Motor Vehicles established by Directive 2007/46/EC, should make every effort to ensure that an opinion is delivered promptly. If the measures envisaged by the Commission are not in accordance with the opinion of that Committee, or if no opinion is delivered, the Commission should act without delay.

Road vehicles: time limit for the implementation of the special rules regarding maximum length in case of cabs delivering improved aerodynamic performance, energy efficiency and safety performance

2018/0130(COD) - 29/01/2019 - Committee report tabled for plenary, 1st reading/single reading

The Committee on Transport and Tourism adopted the report by Karima DELLI (Greens/EFA, FR) on the proposal for a decision of the European Parliament and of the Council amending Council Directive 96/53/EC as regards the time limit for the implementation of the special rules regarding maximum length in case of cabs delivering improved aerodynamic performance, energy efficiency and safety performance.

As a reminder, Council Directive 96/53/EC laying down for certain road vehicles circulating within the Community the maximum authorised dimensions in national and international traffic and the maximum authorised weights in international traffic was last revised by Directive (EU) 2015/719 of the European Parliament and of the Council, one of the aims of Directive (EU) 2015/719 was to improve the aerodynamics of motor vehicles falling within the scope of the Directive by allowing these to derogate from maximum lengths restrictions if certain conditions were respected.

The derogation from maximum length restrictions was granted for the rear of vehicles, for the mounting of aerodynamic devices, and for the front of vehicles to allow for a more rounded and aerodynamic shape of cabs of trucks.

Directive (EU) 2015/719 also included a moratorium of three years for the introduction of aerodynamic cabs after the date of transposition or application of the necessary amendments as regards technical type-approval requirements.

However, the moratorium deters manufacturers from improving aerodynamics of cabs as a way to achieve compliance with the upcoming CO2 standards for heavy goods vehicles.

This proposal for an amending decision only advances the date from which on more aerodynamic and/or safer cabs may be used as already provided for since Directive 2015/719.

The committee proposed that Council Directive 96/53/EC, as amended by Directive (EU) 2015/719, should apply from 6 months (instead of 4 months as proposed by the Commission) from the entry into force of the amending decision.

Road vehicles: time limit for the implementation of the special rules regarding maximum length in case of cabs delivering improved aerodynamic performance, energy efficiency and safety performance

2018/0130(COD) - 17/05/2018 - Legislative proposal

PURPOSE: to amend Council Directive 96/53/EC as regards the time limit for the implementation of the special rules regarding maximum length in case of cabs delivering improved aerodynamic performance, energy efficiency and safety performance.

PROPOSED ACT: Decision of the European Parliament and of the Council.

ROLE OF THE EUROPEAN PARLIAMENT: the European Parliament decides in accordance with the ordinary legislative procedure and on an equal footing with the Council.

BACKGROUND: [Council Directive 96/53/EC](#) laying down for certain road vehicles circulating within the Community the maximum authorised dimensions in national and international traffic and the maximum authorised weights in international traffic was **last revised by Directive (EU) 2015/719** of the European Parliament and of the Council, one of the aims of Directive (EU) 2015/719 was to improve the aerodynamics of motor vehicles falling within the scope of the Directive by allowing these to derogate from maximum lengths restrictions if certain conditions were respected.

The derogation from maximum length restrictions was granted for the rear of vehicles, for the mounting of aerodynamic devices, and for the front of vehicles 4 to allow for a more rounded and aerodynamic shape of cabs of trucks.

Directive (EU) 2015/719 also included a **moratorium of three years for the introduction of aerodynamic cabs** after the date of transposition or application of the necessary amendments as regards technical type-approval requirements.

The moratorium deters manufacturers from improving aerodynamics of cabs as a way to achieve compliance with the upcoming CO2 standards for heavy goods vehicles.

Considering that CO2 emissions from road transport represent a quarter of all CO2 emissions in the EU and that emissions from road transport are projected to grow by 6% in the period 2015 -2030, the Commission considers that **the benefits of elongated cabs should be harvested as quickly as possible**.

The proposal contributes directly to the first political priority of the Juncker Commission: jobs, growth and investment by allowing truck manufacturers and equipment suppliers to innovate and produce new models of heavy goods vehicles. It is also intended to contribute to the energy union and climate priority, through a lowering of emissions from heavy goods vehicles.

CONTENT: this proposal only **advances the date from which on more aerodynamic and/or safer cabins may be used** as already provided for since Directive 2015/719. However, the shortened deadline would remain proportionate and would still allow sufficient time for Member States to take the necessary measures.
