Strengthening of the position of farmers in the food supply chain

2024/0319(COD) - 08/10/2025 - Text adopted by Parliament, partial vote at 1st reading/single reading

The European Parliament adopted by 532 votes to 78, with 25 abstentions, **amendments** to the proposal for a regulation of the European Parliament and of the Council amending Regulations (EU) No 1308/2013, (EU) 2021/2115 and (EU) 2021/2116 as regards the strengthening of the position of farmers in the food supply chain.

The matter was referred back to the relevant committee for interinstitutional negotiations.

The main amendments adopted in plenary are as follows:

Contractual relations and producer organisations

Members support the establishment of **mandatory written contracts** for the delivery of agricultural products. Member States may decide that producer organisations, associations of producer organisations or farmers should make a written offer for a contract for the delivery of agricultural products to the first purchasers.

Member States will establish a mediation mechanism to cover cases in which there is no mutual agreement on the formalisation, interpretation or fulfilment of a contract.

The contract drawn up in writing, in digital form or on paper, must include:

- **the price payable for the delivery** with explicit indication of all payments, including applicable discounts, which will be calculated by combining various objective, verifiable and non-manipulable factors including objective indicators that reflect changes in market conditions, inflation, full production costs, including the remuneration of farmers, the total costs for additional services, the quantities delivered and the quality or composition of the agricultural products delivered;

- **a revision clause** that may be triggered, in particular, by the farmer, a producer organisation or an association of producer organisations, on the basis of unforeseen circumstances, such as extreme weather events, animal disease outbreaks, geopolitical tensions, or any other reason that prevents the agreed price from covering the farmers' costs;

- **details regarding payment periods**, procedures and the point in time in which the ownership and risk transfer.

Members proposed that EU Member States may **exempt** specific sectors of that obligation at the request of an organisation representing the sector. In addition, Member States may decide that neither a written contract nor a written offer are required in one or more of the following cases:

- the delivery concerns products of a value equal to or below a threshold to be determined by the Member State, **which will not exceed EUR 4 000** (compared to EUR 10 000 proposed by the Commission);

- the first purchaser of the agricultural products concerned is a micro or small-sized enterprise;

- the delivery and payment of the agricultural products concerned take place simultaneously or at the latest within 5 working days.

To avoid unnecessary competition between production models, Members opposed the creation of organic producer organisations.

Labelling and marketing

Members want more clarity on the use of the terms '**fair**' or '**equitable**' for agricultural products and want the criteria for allowing such labelling to include:

- stability, including through contracts between producers and buyers to limit the impact of economic uncertainties, traceability and transparency in the relations of farmers with purchasers along the supply chain;

- promoting the development of democratically managed collective organisations of farmers;

- payment of an additional amount to the producer, in particular to fund joint projects;

- a price considered equitable and remunerative by participating farmers for their products and work;

- the contribution of products to the development of rural communities.

According to Members, the term '**short supply chain**' on labels or in advertising should only be used for products produced in the EU with a limited number of intermediaries between the farmer and the final consumer or for products that are handled over a short distance or for a short period.

The Commission will assess the feasibility and added value of introducing a harmonised Union visual label on short supply chain products.

Pesticides in imported food

Members added a condition to the new rules, according to which food and feed of plant and animal origin may only be imported from third countries if they comply with obligations related to the maximum residue levels of pesticides in food and feed produced in the Union.

Public procurement

Members States will ensure that supply contracts awarded under public procurement procedures are sourced from **agricultural and food products originating in the Union**, in particular using local and seasonal products. Priority should be given to products with EU geographical indications.

Strengthening of the position of farmers in the food supply chain

2024/0319(COD) - 10/12/2024 - Legislative proposal

PURPOSE: to strengthen the contractual position of farmers and restore the trust of the actors in the food supply chain.

PROPOSED ACT: Regulation of the European Parliament and of the Council.

ROLE OF THE EUROPEAN PARLIAMENT: the European Parliament decides in accordance with the ordinary legislative procedure and on an equal footing with the Council.

BACKGROUND: the agricultural sector, in particular farmers, face a range of challenges. The Covid-19 pandemic and Russia's ongoing war of aggression against Ukraine have led to an unprecedented increase of energy-related agricultural input costs and a prolonged period of high inflation, affecting farmers' costs and food prices. In parallel, farmers continue to undertake efforts to make their production more environmentally sustainable. Many consumers, dealing with an increased cost of living, have also directed their consumption patterns towards less expensive food products. This has further destabilised the distribution of value added along the food supply chain and has increased the degree of uncertainty in which farmers operate, fuelling protests and mistrust. It is thus appropriate to adopt measures to tackle those challenges and restore the trust of the actors in the food supply chain.

CONTENT: this Commission proposal amends Regulation (EU) No 1308/2013 establishing a common organisation of the markets in agricultural products, Regulation (EU) 2021/2115 establishing rules on support for strategic plans to be drawn up by Member States under the common agricultural policy (CAP Strategic Plans) and financed by the European Agricultural Guarantee Fund (EAGF) and by the European Agricultural Fund for Rural Development (EAFRD) and Regulation (EU) 2021/2116 on the financing, management and monitoring of the common agricultural policy.

The proposed amendments modify only specific aspects of a limited number of provisions in the existing Regulations. They enhance and further strengthen existing provisions regarding contracts involving farmers and their organisations with other actors in the chain, as well as reinforce the bargaining power of producer organisations and their associations, reduce the administrative burden for their recognition, and establish an inductive framework for voluntary schemes and agreements aimed at improving farmers' remuneration and social sustainability initiatives.

More specifically, the proposed amendments seek to strengthen the position of farmers in the agri-food supply chain by:

- simplifying the rules on recognition of producer organisations;
- reinforcing the rules on contractualization. Each delivery of agricultural products should be covered by a **written contract**. These written contracts should include certain elements ensuring transparency and predictability in the calculation of the final price. Contracts with a duration of more than six months should include a **revision clause** to allow farmers, producer organisations or associations of producer organisations to request a revision of the contract;
- establishing a **mediation mechanism** and make it available to parties that wish to use it;
- setting out rules on the use of cross-sectoral optional terms for "fair", "equitable" and equivalent terms, as well as for "short supply chains";
- introducing the possibility to grant Union financial support to Member States for measures undertaken by operators in periods of severe market imbalances;
- improving the degree of organisation of the farming sector in Member States by supporting producer organisations implementing operational programmes and improving the take-up of sectoral interventions in the other sectors.
